

When choosing a mower it is important to select the most suitable machine for your requirements. We have therefore provided a buyers' guide to help you make your decision.

**Cutter system:** perhaps the first major decision to make involves which cutter system best suits your requirements. Below are the three main cutter systems available;

**Flail mower (rough to fair cut):** flail mowers offer excellent versatility whilst maintaining impressive cut standards. Despite being better suited to rougher terrains than their belt driven rotary counterparts, flail heads remain capable of delivering a professional striped finish.

**Rotary mower (fair to fine cut):** rotary cutter systems can adapt to a variety of grass and weather conditions, thus offering impressive versatility. Rotary mowers are often considered the perfect compromise between hardy flail mowers and fine-cut cylinder applications.

**Cylinder mower (fine to premium cut):** a high grade cut is achieved with a cylinder mower which, courtesy of spinning blades forcing grass between a fixed bottom blade, produces a fine scissor like cut. Blade maintenance and alignment are critical to an optimum cylinder cut.

**Mower:** once you have determined your preferred cutter system the next major decision you need to make involves the type of mower that best suits your requirements. Below are the six main mower types available;

**Pedestrian Mowers:**

Hand-held, walk behind mowers.

Available in flail, rotary, and cylinder cut...

Ferris Pedestrian Rotary

Ransomes Fine-cut Cylinder

**Outfront Mowers:**

Ride on, upfront mowers, more suited to commercial applications.

Available in flail and rotary cut...

Kubota Outfront Rotary

John Deere Outfront Flail

**Wide Area Mowers:**

Ride on, wide area mowers, more suited to commercial applications.

Available in rotary and cylinder cut...

Jacobsen Wide Area Rotary

John Deere Wide Area Cylinder

**Ride on Mowers:**

Ride on, mid-mounted mowers, more suited to residential applications.

Available in rotary cut only...

Kubota Ride on Rotary Mower

Ferris Zero Turn Rotary Mower

**Cylinder Ride on Mowers:**

Ride on, cylinder mowers, more suited to professional applications.

Available in cylinder cut only...

Hayter Triple Cylinder Mower

Ransomes Triple Cylinder Mower

**Trailed Mowers:**

Tractor mounted, trailed mowers, more suited to commercial applications.

Available in flail, rotary, and cylinder cut...

Trimax Pegasus Trailed Rotary

Hayter TM Trailed Cylinder
